Dissatisfied with your Nose Appearance?
Fear Surgery?
Looking for Immediate Results?

ALGENESS® IS A 100% NATURAL ALTERNATIVE

IMMEDIATE AND LONG LASTING RESULTS

NO DOWNTIME NO SWELLING

Algeness®
100% NATURAL

ALGENESS NON SURGICAL RHINOPLASTY IS A SAFE, ALL NATURAL ALTERNATIVE.

Rhinoplasty is among the five most popular plastic surgery procedures in the world. As any surgical procedure, there is some pain associated with it and a rather long recovery time which can range from 3 to 12 weeks. Today there is an alternative solution to avoid painful surgery and long recovery times.

A NEW ERA OF NATURAL INJECTABLE IMPLANT

Algeness® injectable implant is the culmination of 10 years of scientific and clinical research. 100% natural and biodegradable, Algeness® is the first of its kind and is intended for those patients seeking to improve nose imperfections without surgery and the related downtime.

SAFE SOLUTION FOR A NEWFOUND CONFIDENCE

Today, patients are increasingly demanding immediate solutions from their beauty professionals. For those who are unhappy with the shape of their nose, a simple treatment of Algeness® injectable implant provides a safe, effective, and immediate

Algeness agarose gel structure
Agarose is an hydrocolloid molecule containing water in its structure.

solution. When performed by an experienced, trained Algeness® cosmetic physician, Algeness® non-surgical "rhinoplasty" can greatly improve the nose shape, helping patients discover a newfound confidence.

ALGENESS® INJECTABLE IMPLANT A BREAKTHROUGH IN THE MEDICAL AESTHETIC INDUSTRY

Algeness® is a biomaterial consisting of a purified agarose gel (polysaccharide), derived from a sophisticated patented manufacturing process. For the first time in the aesthetic medical history, a 100% natural, biocompatible and biodegradable filler is available to you, free from harmful chemicals.

WITH ALGENESS® 100% NATURAL FILLER, WHAT YOU SEE IS WHAT YOU GET!

Thanks to the Algeness® molecular and biophysical structure, as well as our unique injection procedure, your physician is able to Master your Results TM immediately, with minimal swelling and downtime.

FAQ

■ Am I a good candidate?
The optimal candidates for rhinoplasty have no structural nose problems and have realistic expectations regarding the results.

■ Is it painful?
All injections cause a sense of pain; however, the physician may decide to apply anesthetic cream to the injection site to numb the area before the procedure.

■ Can Algeness® correct all kinds of nose defects?
Algeness® injectable implant can correct the shape of the nose but cannot be used to correct structural defects such as those that cause breathing problems.

■ Will my nose dorsum look larger?
Unlike all other HA fillers, Algeness® is a hydrocolloid that will not collect fluids in the tissue after injection and will not enlarge the nose.

■ How long will it last?
Algeness® corrective effects on the nose typically last for about 24 months or longer depending on the product injected.

■ What are the side effects?
The procedure is relatively painless, although there may be some mild discomfort during the procedure. There may be some redness around the site of injection and a little swelling which might last for 1-2 days.

■ What is the recovery time?
Treatment times may vary from 20-25 minutes, depending on the correction level requested by the patient. The recovery time can be from a few hours to 2 days depending on the volume injected. Usually, patients receiving Algeness® treatments return to normal activities straight after injection.

■ What is the difference with other fillers?
Unlike all other fillers, Algeness® is 100% natural and biodegradable. Algeness® achieves its volumizing effects without the requirement of any added chemicals, or cross-linked agents and is completely and safely absorbed over time by the body's natural mechanisms.
