FAQ

■ Am I a good candidate?
If you have deep lines with no excessive fat accumulation as well as good skin condition, you are a good candidate for Algeness® nasolabial correction.

■ Is it painful?
All injections cause a sense of pain; however, the physician may decide to apply anesthetic cream to the injection site to numb the area before the procedure.

■ How will my Laughter lines look like after injection?
Algeness® injectable implant is moldable; once in place, it will be integrated into the tissue. While injecting, the physician will also massage for an even, harmonious, smooth natural look.

■ How long will it last?
Algeness® implant typically lasts for about 12 months or longer, depending on the product and volume injected.

■ What are the side effects?
The procedure is relatively painless, although there may be some mild discomfort during the procedure. There may be some redness around the site of injection and a little swelling which might last for 1 to 2 days.

■ What is the recovery time?
Treatment times may vary from 20-25 minutes, depending on the correction level requested by the patient. The recovery time can be from a few hours to 2 days depending on the volume injected. Usually, patients receiving Algeness® treatments return to normal activities straight after injection.

■ What is the difference with other fillers?
Unlike all other fillers, Algeness® is 100% natural and biodegradable. Algeness® achieves its effects without the requirement of any added chemicals, or cross-linked agents and is completely and safely absorbed over time by the body's natural mechanisms.
